This book offers a new approach to introductory scientific computing. It aims to make students comfortable using computers to do science, to provide them with the computational tools and knowledge they need throughout their college careers and into their professional careers, and to show how all the pieces can work together. Rubin Landau introduces the requisite mathematics and computer science in the course of realistic problems, from energy use to the building of skyscrapers to projectile motion with drag. He is attentive to how each discipline uses its own language to describe the same concepts and how computations are concrete instances of the abstract. Landau covers the basics of computation, numerical analysis, and programming from a computational science perspective. The first part of the printed book uses the problem-solving environment Maple as its context, with the same material covered on the accompanying CD as both Maple and Mathematica programs; the second part uses the compiled language Java, with equivalent materials in Fortran90 on the CD; and the final part presents an introduction to LaTeX replete with sample files. Providing the essentials of computing, with practical examples, A First Course in Scientific Computing adheres to the principle that science and engineering students learn computation best while sitting in front of a computer, book in hand, in trial-and-error mode. Not only is it an invaluable learning text and an essential reference for students of mathematics, engineering, physics, and other sciences, but it is also a consummate model for future textbooks in computational science and engineering courses. A broad spectrum of computing tools and examples that can be used throughout an academic career Practical computing aimed at solving realistic problems Both symbolic and numerical computations A multidisciplinary approach: science + math + computer science Maple and Java in the book itself; Mathematica, Fortran90, Maple and Java on the accompanying CD in an interactive workbook format

Basic Programming, Paul W. Murrill, Cecil Loyd Smith, 1971, BASIC (Computer program language), 154 pages.

A Scientist's and Engineer's Guide to Workstations and Supercomputers Coping with Unix, RISC, Vectors, and Programming, Rubin H. Landau, Paul J. Fink, Jan 1, 1993, Computers, 390 pages. A scientist's and engineer's guide to Workstations and Supercomputers Crack the Unix code and put its power to work for you. If you're seeking such clear-cut guidance, your.

Solving Problems in Scientific Computing Using Maple and MATLAB®, Walter Gander, Jiri Hrebieck, Jun 7, 2004, Computers, 476 pages. Four chapters were added to this new edition while others were revised to use the new possibilities offered by Maple and Matlab.

Relativity and scientific computing computer algebra, numerics, visualization, Friedrich W. Hehl, Roland A. Puntigam, Hanns Ruder, 1996, Mathematics, 389 pages. This book contains lectures by leading scientists from internationally reputed centers of research and teaching. It is split into four parts covering numerics, computer algebra.

Beginning Programming in 24 Hours, Sams Teach Yourself, Greg Perry, Dean Miller, Dec 2, 2013, Computers, 464 pages. If you want to learn computer programming but don't know which language to start with, this is the book for you! In just 24 lessons of one hour or less, any beginner can get a.

A Guide to MATLAB For Beginners and Experienced Users, Brian R. Hunt, Ronald L. Lipsman, Jonathan M. Rosenberg, Kevin R. Coombes, John E. Osborn, Garrett J. Stuck, Jun 8, 2006, Mathematics, This is a short, focused introduction to MATLAB, a comprehensive software system for mathematical and technical computing. It contains concise explanations of essential MATLAB.

Numerical Methods, Balagurusamy, Jul 1, 1999, C (Computer program language), 608 pages.

Wretched Earth, James Axler, Jul 3, 2012, Fiction, 320 pages. When a virulent strain of a predark biowep turns the denizens of northern Kansas into flesh-eating monsters, Ryan Cawdor and his companions have one chance to turn the A Man in Full A Novel, Tom Wolfe, 2001, Fiction, 690 pages. Charles Croker, a middle-aged, egotistical former college football star turned tycoon, finds his life turned upside down and the delicate racial balance of Atlanta threatened
